☐ I am including cash when dropping off my sample/s ☐ I paid online on ___ / ___ / ___ and my order number was _____

How to Prepare & Send Your Sample

1.	Write your horse's name on a zip-lock bag and put 1 small ball of fresh manure into the bag (approx. 1 tablespoon is sufficient)
2.	Squeeze out the air from the bag and seal it. Repeat for each horse.
3.	Put all the individual sample bags into another zip-lock bag and seal it. Wrap them together in plastic wrap (a few layers) if you don't have a large zip-lock bag. This helps keep the odour locked inside as it permeates the plastic bags quite quickly.
4.	Place the bag and this form into a padded envelope (or wrap in bubble wrap and use a postage satchel) and post to: Hoofbeats FEC Service, 96 Ceylon Road, Belli Park QLD 4562. Please note: Exposure to ongoing heat will kill the eggs within a few days, so it's important to post/deliver the sample as soon as possible and to Express Post samples to ensure that your results are accurate. If you can't post the sample the same day it's collected, keep it in the fridge overnight and post it the next day.
